

NEWS ALERT

Cortec® Middle East Creates Positive Impression at ADIPEC

Cortec® Middle East (CME) welcomed many professionals from the oil and gas industry to its impressive booth near the hall entrance at the November 12th-15th ADIPEC (Abu Dhabi International Petroleum Exhibition & Conference) show. Once again, CME's open and welcoming booth design grabbed the attention of attendees such as petroleum engineers, corrosion inspectors, buyers, process and pipeline engineers, and directors from different oil and gas sectors. Visitors to the booth kept CME representatives busy answering questions about corrosion protection technologies and other different preservation applications.

CME's intriguing Vapor Corrosion Inhibitor detection display also drew special interest. The model was made of two clear acrylic boxes joined by a tube. This setup allowed vapors from VpCI® powder placed in one box to travel to the other box where a digital detector was placed. The model demonstrated the ability of VpCI® to fill a void space with protective vapors that safeguard metal surfaces from corrosion.

Special thanks go to CME for providing an impressive representation of Cortec® VpCI® solutions to the thousands of companies and dozens of countries represented at this major petroleum exhibition!

Cortec® Corporation is the global leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001 and ISO 14001 Certified, and ISO 17025 Accredited.
