

NEWS ALERT

Join Us at the AWT Convention to Expand Your Water Treatment Horizons!

The AWT convention is next month! We hope you can join us for several days of networking, exhibits, and education specifically related to the broad field of water treatment. Members of our technical and R&D team are headed to Vancouver, B.C., to chat with you and other water treatment specialists about your corrosion control, preservation, and layup needs. This is a great opportunity to find corrosion solutions and expand your water treatment horizons!

For example, if you are still wondering how Cortec® Technology is different from other water treatments, we invite you to come to our booth and ask about our steel wool demo. While there, you will be able to “meet” a variety of our water treatment “animals” on display and hear about a new water treatment “reptile” that could be coming soon to a cooling tower near you!

Also, be sure to check the schedule so you do not miss our Commercial Corner with Scott Bryan, CWT (Technical Sales Manager – Water Treatment). The title of this year’s presentation is “Water Treatment Preservation Solutions Using VpCI® Technologies.” It will cover the topic of best practices for preparing and performing boiler and cooling water system layups, as well as the question of how to start a conversation with your customer about the Boiler Lizard® and Cooling Loop Gator®.

Come ready to learn, network, and grow with us as we “immerse” ourselves in the water treatment industry! Learn more, sign up today, and let us know if you are coming!

AWT 2022 Annual Convention & Exposition

September 21st- 24th, 2022
Vancouver Convention Centre
Vancouver, Canada
Booth #124
