

NEWS ALERT

Fifteen Minutes at AWT Could Prove Invaluable for Your Water Treatment Clients

Are you heading to the AWT Annual Convention and Expo this year in Palm Springs, California? Do not miss Cortec's "Commercial Corner" from 8:00-8:15, Thursday morning, September 12th. Scott Bryan, a Certified Water Technologist and Cortec's Technical Sales Manager for Water Treatment Products, will be speaking on "Overcoming Challenges in Protecting Idle Equipment with Vapor Phase Corrosion Inhibitor (VpCI®) Technology."

Industrial water equipment is at higher risk for corrosion when idle. This can complicate startup and reduce asset service life, resulting in unplanned losses. Scott Bryan will share practical tips on how VpCI® Technology can reduce startup problems and increase asset reliability for your customers' equipment. This short 15-minute talk may be just what you need to introduce your clients to some of the simplest, yet effective, methods of water treatment on the market!

Be sure to head over to Booth #163 before or after the "Commercial Corner." We'd love to speak with you and answer questions one on one!

Commercial Corner Location: TBA – Please refer to your AWT schedule for updates!
