

NEWS ALERT

Ash Hasania Elected to ICRI Michigan Board!

MIGRATING CORROSION INHIBITORS
FROM GREY TO GREEN

We are pleased to announce that Ash Hasania has been elected to the board of the ICRI Michigan Chapter! As our MCI® Technical Sales & Market Manager, Ash has been heavily involved in attending and presenting at chapter events over the last few years, prompting ICRI Michigan to ask Ash to consider joining the board. Ash was officially voted into office November 9th at the “ICRI Michigan Chapter’s Annual Dinner Meeting,” and we look forward to seeing many positive results!

Ash will start his term as a board member “at large,” helping plan and oversee chapter activities and casting his ballot on issues that come up for voting. This role will bring Ash into even more contact with chapter members who are engineers and influencers, providing more opportunities for Ash to educate the construction industry on the benefits of using corrosion inhibitors in concrete. Ash is also expected to be a great asset to ICRI Michigan as a liaison between the local chapter and ICRI national through his attendance at events on both levels. He looks forward to growing professionally as he takes on many new responsibilities.

We are proud to have such dedicated and knowledgeable individuals bringing [MCI® Technology](#) to the grassroots and adding value to their local chapters. ICRI membership is a great way for anyone to learn more and get better connected with the industry, and we encourage all our MCI® distributors to consider getting more involved by [joining their local chapter!](#)
