PRESS RELEASE

Cortec's New Automotive Brochure Now Available!

Cortec® has published its NEW Automotive Brochure! This brochure delivers information on all that Cortec® products have to offer our customers and clients in the automotive industry. The available automotive products are detailed and categorized by their use. The brochure illuminates the need for Cortec® products in applications such as de-rusting, protection of raw materials, shipping, and storage.

The automotive industry has presented difficult challenges to researchers in fighting the effects of corrosion in economic loss and environmental safety. Cortec® offers highly efficient and economical corrosion protection for automotive applications. Cortec® products have been developed using its Patented VpCI® technology which is a safe, cost-effective method for preventing and diminishing the severe damage caused by corrosive process streams.

Cortec's VpCI® technology offers an environmentally safe method of treatment with low toxicity and low polluting effects. Unlike corrosion inhibiting systems of the past, Cortec's VpCI products do not contain chromates or other heavy metals, nitrites, or chlorinated hydrocarbons. With the support of our corrosion scientists, engineers, and testing facility, Cortec® can provide simple, environmentally friendly, cost-effective solutions to corrosion problems.

Unlike conventional methods, such as filming amine corrosion inhibitors, you can introduce Cortec® VpCI's into any part of your system. Cortec® VpCI's go to work immediately and are self-replenishing. Continuous, uninterrupted protection in the liquid phase, interphase, and vapor phase can be added at multiple points.

With years of experience and knowledge, Cortec® understands the needs of the market. In order to facilitate and achieve success, the main purpose of this brochure is to provide our clients with up to date information. In order for Cortec® to be able to continue to facilitate and ensure that its customers' needs are met efficiently, we provide:

Quality Management System (ISO 9001 Certified)

- World Class Product Offerings
 - An innovative producer of leading edge products.
- World Class Customer Service
 - A positive, long lasting impression through every link of our company.
- World Class Environmental Commitment
 - Cortec® commits to continued development of processes and products that are useful, non-hazardous to the environment, and recyclable whenever possible.
- An Ethical and Respectful Company Culture
 - Respect and treat our colleagues, customers, and vendors as we would our own family members.

Environmental Management System (ISO 14001 Certified)

Cortec's strong environmental concern is demonstrated in the design and manufacturing of products that protect materials of all kinds from environmental degradation. A strong commitment to produce recyclable products made from sustainable resources has been and will be our future policy.

Laboratory Accreditation (ISO/IEC 17025)

Ensures quality testing services, and to continually improve the effectiveness of the Quality Management System. It is Cortec[®] Corporation's goal to encourage active participation of all employees in quality planning and continual improvement efforts to meet all quality and service objectives. Cortec[®] Laboratories is the only lab in our industry that received ISO/IEC 17025.
