PRODUCT NEWS RELEASE

Cortec® Corporation Introduces the Newest Addition to their Bio-Based Line.

BioClean Spray is Cortec's newest addition to their Bio-based line of products. BioClean Spray is a blend of coconut oil phospholipids, "green" corrosion inhibitors, and surfactants designed to disperse and inhibit microbiological growth. Cortec's BioClean Spray eliminates existing microbiological contamination, as well as provides the prevention of future growth.

Cortec's BioClean Spray eliminates existing microbiological contamination, as well as provides the prevention of future growth.

Contrary to traditional anti-microbiological methods, Cortec's BioClean Spray is non-toxic, non-hazardous, biodegradable, and is manufactured from renewable resources. BioClean Spray contains the same gentle and non-irritating technology that can be found in cosmetics and personal care products such as hand cleaners, shampoos – even baby wipes. Through this unique chemistry, BioClean Spray is powerful enough to maintain the performance mandated by industry standards; while providing a solution that is truly safe for both humans and the environment.

BioClean is packaged in EcoAir® spray cans without propellants and are safe for handling, transport, and disposal. BioClean Spray is also offered for spot cleaning applications (BioClean Wipes) and in a liquid form as an additive (BioClean 610).
