PRESS RELEASE

Cortec® Presents “Green” BioClean Spray - Gentle Solution for Hard Surfaces!

BioClean Spray, a new addition to Cortec®’s bio-based line of products is a blend of coconut oil phospholipids, “green” corrosion inhibitors, and surfactants designed to disperse and inhibit microbiological growth. It is non-toxic, non-hazardous, biodegradable, and is manufactured from renewable resources. Cortec®’s BioClean Spray perfectly eliminates existing microbiological contamination, as well as provides the prevention of future growth. The product is designed to clean hard surfaces such as wood, metal, plastics, etc.... and provide strong corrosion protection!

BioClean Spray is the ideal solution for cleaning hard surfaces. It is manufactured utilizing the latest green, environmentally safe technology by blending coconut oil phospholipids, "green" corrosion inhibitors, and surfactants.

Contrary to traditional anti-microbiological methods, BioClean Spray contains the same gentle and non-irritating technology that can be found in cosmetics and personal care products such as hand cleaners, shampoos, and even baby wipes! Through this unique chemistry, BioClean Spray supports antimicrobial properties and is powerful enough to maintain the performance mandated by industry standards while providing a solution that is completely safe for both humans and the environment.

Cortec's BioClean Spray is easy and simple to apply. It eliminates existing microbiological contamination, as well as provides the prevention of future growth, saving customers's time and money.

Non-irritating and ready to use BioClean spray is packaged in Eco Air[®] spray cans without propellants and is safe for handling, transport, and disposal. BioClean Spray is also offered for spot cleaning applications and in a liquid form as an additive.

BioClean Spray has been tested by certified laboratory in accordance with ASTM F-483 (Total Immersion Corrosion Test) and is RoHS and REACH compliant.
