Bionetix® Helps Make History at First PSAI International Summit

Attending PSAI's first International Summit, November 5th-7th in Toronto, offered a glimpse of the exciting potential on the horizon for [Bionetix®](#) and its associates in the field of portable sanitation. As a Canadian company exhibiting on home turf at the first PSAI (Portable Sanitation Association International) event outside the U.S., Bionetix® was especially proud to represent leading edge biological solutions to guests from around the world.

Bionetix® manufacturer's rep Juan Carlos Acosta Morena (Manitu-San) joined Tonya Decterov (Bionetix® Product Manager) for this historical gathering, where some of the biggest players in portable sanitation showed up. In general, attendees expressed interest in finding efficient, long-lasting, and trustworthy products. In particular, Bionetix® stood out among other exhibitors because of its innovative, environmentally friendly products. A new drop-and-go version of [BIO-BOOM™](#) technology especially captured attendee interest (stay tuned for the official release)! With so many international attendees together in one place, it was also exciting to hear more about portable sanitation operations around the world and connect with an invaluable network of industry professionals.

The team wrapped up the summit with a visit to the Hockey Hall of Fame and came away feeling that, in a sense, Bionetix® had also made its mark on portable sanitation history by contributing to this niche event in its home country.

Bionetix® looks forward to continued growth in this critical industry and invites you to join the quest to spread practical, friendly portable sanitation solutions to users around the globe! [Contact Bionetix® to get involved in making history with the portable sanitation BIO-BOOM™!](#)
