## Bionetix® International Earns ISO 9001:2015 Quality Management Recertification

January was ISO 9001:2015 audit time at Cortec's biotechnology subsidiary in Ste-Anne-de-Bellevue, Quebec! As usual, Bionetix® passed the quality management system recertification audit with no major or minor non-conformities. Bionetix® International's new certificate went into effect on March 1<sup>st</sup>, 2020, and will be good for three years, pursuant to passing annual surveillance audits.

Bionetix® has been ISO 9001 Quality Management System certified since February 2008 and takes pride in its commitment to providing excellent products and services to its valued customers! For Bionetix®, this takes the form of designing, developing, and manufacturing top quality microbial products, natural hygiene solutions, and environmental treatments that provide the missing link between environmental protection and effective treatment. These treatments are specially adapted to the special needs of the application – rather than taking a haphazard “one size fits all” approach – and have been used in countless applications globally.
