PRESS RELEASE

Bionetix® Prepares to Make Clean Sweep on Grease, Odor, Wastewater Problems at ISSA North America!

Waste, dirt, and odor buildup are parts of everyday life. They are also byproducts of a bustling economy. For instance, a productive food industry generates high levels of waste fats, oils, and greases (FOG) that can ultimately clog drains or grease traps and overload wastewater treatment systems. Heavily used restrooms, portable toilets, and septic systems get dirty, cause odor problems, or experience

sludge buildup. While wastes eventually break down through natural processes, facility owners can speed up biodegradation, enhance cleaning, and avoid hazardous chemical products through the use of natural biologicals from Bionetix® International.

Bionetix® International will be highlighting a number of these biotechnology solutions at the upcoming ISSA Show North America, November 18th-21st in Las Vegas, Nevada. This convention brings together thousands of cleaning and

maintenance industry professionals to share ideas, make connections, and discover solutions for their cleaning and maintenance needs. Standing out from the traditional chemical cleaning industry, Bionetix® will be sharing natural biological solutions at booth #234. These biotechnologies rely on the activity of “good” bacteria to accelerate the natural waste degradation process.

Bionetix® puts non-pathogenic microorganisms to work doing what they love to do: eat contaminants. While some microbes prefer the FOG prevalent in the restaurant industry, others prefer cellulose, starches, and proteins that may comprise a higher percentage of waste in different industries. Whatever the target contaminant, Bionetix® technologies are specially designed and selected for optimal performance in specific applications:

- Septic tank maintenance (BIO-BOOST TABLET 1T™, [FIZZY-TAB™](#))
- Drain and grease trap flow improvement ([ECO-DRAIN™](#), [GTC 3X™](#), [BIOBLOC22™](#))
- Portable toilet/urinal treatment ([PORTA-TREAT™](#), [URINAL BLOCKS™](#))
- Municipal wastewater treatment “seeding” startup ([BCP50™](#))
- General odor control ([HYGIEA2200™](#))
- General cleaning ([ECO-CLEAN-ALL™](#))

Bionetix® leverages the power of “good” bacteria and nutrients to enhance cleaning formulations and cut down on sludge, blockages, and odors. Rather than just mask the odors, Bionetix® biologicals release enzymes that destroy the odor causing compounds at the root of the problem, leaving simple carbon dioxide and water as byproducts after the microbes have finished digesting their “dinner.”

The same principals are applied in Bionetix® biological cleaners, detergents that work on organic stains. Microorganisms in the formulations boost cleaning power in an efficient and natural way.

Bionetix® biologicals have been used around the world to produce many other exciting natural solutions for soil remediation, crop enhancement, water clarity, and aquaculture health, as well. They not only serve as direct solutions for end users but are also available in custom-made private label format for

entrepreneurs who want to start their own line—or for established brand names that are ready to enter the emerging biotechnology market for themselves.

Get ready to make a clean sweep on grease, odor, and wastewater problems by contacting Bionetix® today, or plan to meet us at ISSA booth #234 in Las Vegas!

Bionetix® International produces biological waste treatment products that are used in thousands of field applications worldwide. The Biological Series of products—among the earliest products introduced by Bionetix Canada – can be found in countless food preparation and processing locations in the United States, Europe, South America, and Asia. Numerous municipalities around the world have accepted these products. Headquartered in Quebec, Canada; Bionetix International is a subsidiary of Cortec® Corporation. ISO 9001:2000 Certified.

Cortec® Corporation is the global leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Our relentless dedication to sustainability, quality, service, and support is unmatched in the industry. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001, ISO 14001:2004, & ISO 17025 Certified.
