Case History #173: ElectriCorr® VpCI®-238 for Marine Maintenance!

CASE HISTORY
ElectriCorr® VpCI®-238

PROBLEM
Mobile Marine Electronics operates a marine maintenance business specializing in the servicing of electronic components such as radar, sounders, plotters, etc. These products are exposed to an extreme salt water environment and are severely corroded. They need an effective cleaner for these electronic parts they are servicing.

SOLUTION AND APPLICATION
Cortec® ElectriCorr® VpCI®-238 was used to restore corroded electronic pieces. VpCI®-238 washed the corrosion right off the circuit boards so effectively they were able to be reinstalled. A month after the circuit boards were cleaned with VpCI®-238, there were no signs of further corrosion and a noticeable protective coating existed on the pieces.

CONCLUSION
Mobile Marine Electronics was very impressed with the corrosion-free results. ElectriCorr® VpCI®-238 was just the product they were looking for.

ch173 12/8/00

ElectriCorr® VpCI®-238 turned out to be just the right product for a mobile marine electronic maintenance business to use in fighting corrosion on its service rounds. The company needed an effective cleaner for the radar, sounders, plotters, and other electronic components that could become severely corroded in an extreme saltwater environment. When they tried using ElectriCorr® VpCI®-238 on circuit boards, they were able to clean away the corrosion so well that the components could be reinstalled. A month later, they could tell there was a protective coating on the circuit boards with no signs of further corrosion. The maintenance company was impressed with the results and knew it had found the right cleaner for the job.
