DATE
December 2017

LOCATION
Ryazan, Russia

CUSTOMER
Golden Spur Restaurant

PRODUCT
BCP22™
ECO-TRAP™ L

PROBLEM

Several years ago, the customer had trouble with operating the sewerage and grease trap in its restaurant. Frequent blockages and clogging of the sewerage, plus an unpleasant odor coming from the grease trap, became a headache.

APPLICATION

The solution was to add biological products ECO-TRAP™ L and BCP22™ directly into the sewer pipe (via the drain holes in the sinks) and grease trap.

CONCLUSION

The customer concluded that both products were effective and wrote an official letter of recommendation encouraging their use in food production facilities.

Frequent sewer clogging—plus bad smells from the grease trap—had become a headache at one restaurant in Russia. In 2017, they decided to try adding Bionetix® ECO-TRAP™ L and BCP22™ to the sewer pipe and grease trap. The results were so good that the restaurant wrote an official letter recommending the products for use in other food production facilities!
