MIGRATORY CORROSION INHIBITOR (MCI®) PRODUCTS FOR CONCRETE

Case History Spotlight #502: MCI®-2005 for Water Reservoir

A water consortium that had previously had many corrosion problems wanted an innovative solution for a new reservoir they were building. [MCI®-2005](#) concrete admixture was dosed at 0.6 L/m³ in a total of 1500 m³ of concrete forming the rectangular reservoir. This was an ideal solution because of their need for better durability from the start, as well as a product that could be used in a structure holding drinking water.
