

CASE HISTORY SPOTLIGHT

Case History Spotlight #542: Preserving Screw Compressor Air-End Parts for Export

A supplier of screw compressor air-end parts was required to export the components clean and rust-free from India to five different countries around the world where plants of a big-name industrial equipment manufacturer were located. To do so, they adopted Cortec® products for work-in-process and packaging activities. S-69 was used to protect the components during hydrostatic testing. The components were cleaned and degreased with VpCI®-419. For packaging, the supplier used CorShield® VpCI®-146 paper and wrapped the components in VpCI®-126 Bags before crating. These innovative corrosion prevention products helped the supplier to fulfill all of their customer's expectations for clean and rust-free delivery.
