

VpCI® ADDITIVES FOR WATER TREATMENT

CASE HISTORY SPOTLIGHT

Case History #598: Closed-Loop Cleaning and Preservation on Private Yacht

One of the world's largest privately-owned yachts was taken to France for maintenance and repair. The pipes of the VACON drives needed to be cleaned from heavy scale in a very short time-frame. Cortec's representative was able to supply the preservation and cleaning products within three days. A diluted solution of [VpCI®-426](#) was used to remove scale and corrosion, followed by [VpCI®-415](#) (also diluted) to neutralize the acid. A low dose of [VpCI®-649](#) was used for closed-loop preservation. The solution proved to be efficient and satisfactory to the customer, who was pleased with the speedy assistance.
