

HIGH PERFORMANCE VpCI® PACKAGING

CASE HISTORY SPOTLIGHT

Case History #655: Turret Brake Preservation

A manufacturer had to ship 18 turret brakes for a portside gantry crane from North America to Singapore. Length of storage was uncertain, so the manufacturer wanted to package the brakes with enough protection to inhibit corrosion for at least one year. The first step was to spray all machine surfaces with VpCI®-368 removable coating. Then the brakes were wrapped in VpCI®-126 Shrink Film and packed in crates. Another crate with spare parts and a control panel was protected by placing VpCI®-308 Pouches inside. The brakes were ready for shipment at the end of February 2020 and exported to Singapore well-equipped for preservation during an indefinite storage period.
