CASE HISTORY SPOTLIGHT

Case History #687: Long-Term Preservation of Vehicle Transmissions

A logistics company in Thailand had 263 automotive transmissions that it needed to preserve for a five- to seven-year period. They decided to wrap the transmissions in CorrLam® LD VpCI® Barrier Laminate for long-term protection. This was done by placing each transmission on the blue side of a sheet of CorrLam® LD VpCI® Barrier Laminate, folding the sides together, and sealing the edges of the CorrLam® shut. The customer was happy with how easy it was to use CorrLam® LD VpCI® Barrier Laminate, and as of four years into the storage period, there had still been no complaints about corrosion.
