MIGRATORY CORROSION INHIBITOR (MCI®) PRODUCTS FOR CONCRETE

# CASE HISTORY SPOTLIGHT

## Case History #697: Concrete Oil Stain Cleanup at Golf Course

A golf course owner wanted to clean up significant hydrocarbon oil stains on an outdoor concrete pad used to park equipment and machinery. MCI®-2061 concentrate was applied and brushed into the concrete. Water was used to activate microorganisms, and the “green” cleaning product was left overnight to allow biodegradation to occur. Treated areas were rinsed with water the next day. The customer was extremely happy with the results and the fact that MCI®-2061 was so easy to use as an alternative to blast cleaning.
