Bionetix® Brings Natural Wastewater and Beach Cleanup Solutions to Colombia

Cartagena, Colombia - The joint convention of the 62nd International Congress of ACODAL and the XVIII Congress of Region III of AIDIS was a significant opportunity for Bionetix® International to bring natural wastewater and beach cleaning solutions to important players in the water/environment/sanitation sector. With Canada being the guest country of honor, it was an especially good year to present Bionetix® biological solutions to the emerging Colombian market.

Oscar Caceres (Bionetix® Inside Sales Rep), was pleased to connect with several prominent companies during the three-day event:

- The top Colombian manufacturer of portable plastic toilets, who is interested in implementing Bionetix® environmentally friendly, safe, and effective portable toilet holding tank treatment products to replace its current supplier

- A foremost domiciliary utility company in Colombia, which services 3.6 million people in Medellín and the Metropolitan Area of the Aburrá Valley alone and is investigating ways to reduce organic contamination and improve dissolved oxygen levels in the Medellín river

- A longstanding chemical treatment company that emphasizes bio-organic catalysts and is interested in incorporating Bionetix® into its aquaculture division

- A beach management company that wants Bionetix® to help solve hydrocarbon and organic contamination problems in beaches all over Latin America and Europe

Bionetix® looks forward to working with and filling an important market need for these and other companies in the region by supplying quality biological solutions for wastewater, aquaculture, environmental cleanup, and much more.

Cortec® Corporation is the global leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries.
