## Cortec® Corporation Appoints a New Director of Corporate Quality and Regulatory Affairs.

June 18, 2007

We are pleased to announce that Christophe Chandler, Phd. is now Cortec's Director of Corporate Quality and Regulatory Affairs. Christophe has been with Cortec for over 17 years, and has been involved with numerous aspects of the business.

In this newly created position, Christophe is responsible for Cortec's corporate initiative to manage all operating units in the same and consistent manner in regards to our Quality and Environmental Management Systems which includes Cortec's ISO certifications. Quality control and assurance at all facilities will be accountable to Christophe.

Christophe will oversee all aspects of the organization's quality and environmental improvement efforts, such as developing and administering programs, training, coaching employees, and facilitating change throughout the organization. He will be responsible for establishing strategic plans, policies, and procedures in regards to quality and environmental improvement efforts, that will continue to exceed internal and external customer's needs and expectations.

Cortec® Corporation's competitiveness and continuing vitality depend in large on the quality of its products and services. Achieving quality depends in turn on leadership, commitment, teamwork, and measurement of the results.

Cortec® Corporation is a pioneer of environmentally friendly, corrosion protection Vapor phase Corrosion Inhibitors (VpCI™) & Migratory Corrosion Inhibitors (MCI®) technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas and other industries. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001 & ISO 14001:2004 Certified.
