

NEWS ALERT

Plan to Join Us in Boston for the Spring ICRI Convention!

MIGRATING CORROSION INHIBITORS
FROM GREY TO GREEN

Spring is almost here, and that means it's time for the Spring ICRI Convention! This year's gathering will take place in Boston with the theme of "Transportation: Roads, Bridges, Tunnels." Here are three great reasons to attend!

- **Connect**

Visit our MCI® booth to chat about the latest [MCI® news](#) with Jessi Meyer (VP, Technical Sales – Product Management – Marketing), Ash Hasania (MCI® Technical Sales & Market Manager), and Kevin Quan (MCI® Regional Sales Manager); discuss products and project opportunities; and share success stories. ICRI Spring also offers plenty of opportunities to socialize—both for pleasure and professional purposes! In the meantime, expect to find yourself surrounded with fellow chapter members and everyone from engineers to contractors and manufacturers.

- **Learn**

ICRI is also a great place to grow your concrete repair knowledge and understanding as you choose from a variety of technical tracks and take advantage of opportunities to earn PDHs. Attending one of the many open committee meetings will teach you even more about the industry and the inner workings of ICRI as new specifications and initiatives are discussed.

- **Influence**

Attending ICRI committee meetings is also an excellent way to share the special expertise that you bring to the table and eventually play a role in shaping the future of concrete repair. Almost all committee meetings are open to everyone, so take advantage of the opportunity to get involved!

With the Spring ICRI Convention just a little more than one month away, now is not too soon or too late to start making your travel plans. We hope to see you there!

ICRI Spring Convention
April 22nd–24th, 2024
Westin Copley Place
Boston, Massachusetts
