

## **Cor-Pak® Stretch Film from EcoCortec® - New Formulation that will Conquer European Market !**

We are proudly announcing that our long awaited, new improved formulation of Cor-Pak® machine grade and hand wrap stretch film has been successfully extruded in EcoCortec® plant, Croatia, using new construction, based on high-tech resins.

**Extrusion of Cor-Pak® VpCI® Stretch Film**

Today when Croatia is entering European Union, at EcoCortec® we are happy to offer this newly reformulated Cor-Pak® VpCI® Stretch Film to our distributors. Cor-Pak® VpCI® Stretch Film provides more efficient and cost effective corrosion protection solution for primary packaging and unitization. It is the only product in the world that offers both vapor phase and contact protection to multi metals!

Advantages and benefits of this film are so numerous that it simply **MUST** become a bestseller and help regain VpCI® Stretch Film business that was lost in the past. This improved film will help our distributors grow their market shares significantly, especially in the steel business throughout Europe.

With help from our young and energetic EcoCortec® staff - sales of our packaging products in Europe are set to rise and we are calling upon our distributors and reps to take full advantage of this undeniably excellent new packaging solution immediately and regain old as well as conquer new packaging markets.

Having a manufacturing plant in Europe gives huge, undeniable advantages like control over quality, price, and timely delivery. Our team is here to help you increase your profits and place this new film on the market. EcoCortec® in Beli Manastir, Croatia, is ideally situated to provide for all your sales needs. With new reformulated Cor-Pak® VpCI® Stretch Film our plant has absolutely no relevant competitor in Europe!
