

NEWS ALERT

New use for Cortec® Cor-Pak® Linerboard: CorrTube™ by The Callenor Company.

Cortec® Corporation is pleased to announce that The Callenor Company, Inc. has created CorrTube™ using Cortec's Cor-Pak® Linerboard with patented Vapor phase Corrosion Inhibitor (VpCI™) chemistry. CorrTube™ is easily customized to fit your packaging needs. It comes in a variety of sizes ranging from 0.375" to 12.625" ID, and multiple wall thicknesses and lengths up to 53'.

CorrTube™ is treated on the inside and/or outside of the core using Cortec's Cor-Pak® Linerboard. The protective vapor that is emitted from the CorrTube™ protects all enclosed metals against corrosion; including alloys, ferrous, and non-ferrous metals. The tubes are spirally wound to ensure you receive the highest quality of packaging to protect your valuable product. CorrTube™ is environmentally friendly, safe to use, non-toxic, and 100% recyclable and repulpable.

The Callenor Company is a leading manufacturer of paper shipping cores to the steel bar industry for over 50 years. They provide many different product styles for different applications.

For more information or to order CorrTube™, you can visit their website directly at www.callenor.com, contact them by email at sales@callenor.com, or contact Cortec® at info@cortecvci.com.
