## Cortec and Grafem Ink Development and Supply Contract

**St. Paul, MN (July 6, 2012)** – [Grafem](#), a family owned corrugated paper packaging company based in Maribor, Slovenia, has received a supply contract for development and production of CorrTainer, a Cortec Corp. product.

The non-toxic, recyclable, and repulpable CorrTainer is a coated and moisture resistant Vapor phase Corrosion Inhibitor (VpCI) barrier. The CorrTainer deal was a deal between Grafem and EcoCortec, a Cortec business unit that manufactures biodegradable films and bags in Central and Eastern Europe.

### Future Projects Possible

"CorrTainer saves a lot of precious time and manpower, no prior preparation or secondary packaging is needed, and more importantly, it is low in cost, which makes it an ideal packaging choice for our customers," Jozef Cvetko, Grafem CEO, said. "We are thrilled that our cooperation with Cortec has resulted with this remarkable product and hope that its good market acceptance will be encouragement for future projects between the two companies."

In 2011, Grafem moved into a new facility and increased its manufacturing capacity. The company's laboratory is designed specifically for quality testing of CorrTainer. [www.grafem.si/eng\\_index.html](http://www.grafem.si/eng_index.html)

Cortec Corp. produces corrosion control technologies for packaging, metalworking, construction, electronics, water treatment, oil & gas, and other industries. It manufactures more than 400 products distributed worldwide. [www.cortecvci.com](http://www.cortecvci.com)
