

NEWS ALERT

Join Us Next Week for the Inaugural AMPP Annual Conference + Expo

We hope you can join us next week for the inaugural AMPP Annual Conference + Expo in San Antonio, Texas! In addition to being together once again after pandemic isolation, this will be the first time ever to experience the best of NACE CORROSION and SSPC Coatings+ conferences merged into one event.

At AMPP, you will be able to connect with many corrosion control industry professionals and touch base with the Cortec® team. Stop by our booth throughout the week for opportunities to discuss your business development ideas with leaders of our sales department, ask Cortec® R&D your technical questions or float new product ideas, and possibly even chat with our founder, Boris Miksic, about the early days of Cortec® history.

As AMPP covers the entire range of corrosion related topics, so Cortec® will be offering solutions to corrosion in our multiple industry focus areas:

- VpCI® Packaging (VCI Papers, Film, and Emitters)
- MCI® Concrete Structural Durability Solutions
- Micro-Corrosion Inhibiting Coatings™
- VpCI® Water Treatment
- Oil & Gas Solutions
- And More!

AMPP will also provide a wealth of educational and training sessions to take advantage of, including more than 1,000 hours of technical content across 15 industry and technology tracks. Of special note are presentations on "Use of Vapor Phase Corrosion Inhibitor for Tank Bottom Protection" during the "Coatings and Corrosion Control for Storage Tanks" symposium (chaired by Khalil Abed from Cortec® Middle East) and "Corrosion Inhibitor of Automotive Parts in Water-Ethylene Glycol Solutions" by longtime Cortec® collaborator Dr. Bavarian of California State University, Northridge.

AMPP is a great time to have fun getting down to business fighting corrosion and finding new opportunities to learn and grow. Come join us next week!

AMPP

March 6th- 10th, 2022

Henry B. Gonzalez Convention Center

San Antonio, TX

Booth # 1909
