Cortec Corporation and Tart at Future Forces 2014!

Cortec Corporation and our Czech distributor, Tart have successfully participated at the 11th International Defense and Security Exhibition and Conference, FUTURE FORCES 2014 which took place from October 15 -17 in Prague, Czech Republic. Almost 130 exhibitors, 500 experts attending international workshops and 580 official delegates from 48 countries makes FUTURE FORCES 2014 the biggest meeting of defense and security industry.

Widely supported by authorities from NATO and Partner Countries all over the world, FUTURE FORCES 2014 hosted respected defense and security professionals worldwide. This event has been a great opportunity to present Cortec military corrosion prevention solutions. Cortec has also been invited to present the use of successful corrosion protection systems for different problems identified by the US

military as well as military worldwide at the Capable Logician Workshop. At the Workshop we were able to meet with military logistics professionals to share current needs and discuss future business opportunities.

We have received a lot of positive feedback from our booth visitors which affirms our constant striving to be a global leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies. Among other visitors, we were honored to welcome Brig. Gen. William E. Cole of US Army to our booth.

It has been a great show and the cooperation with our partner Tart has been a wonderful experience!
