## Cortec® SEA Moves to New Offices in Singapore!

We are excited to announce that Cortec® Southeast Asia (SEA) has relocated to a spacious new facility in Singapore! Cortec® SEA made the move at the beginning of the fourth quarter 2020 to meet the needs of their growing staff and strategically locate themselves near key customers. The new facility includes meeting rooms to host clients for technical and awareness sessions and also brings Cortec® SEA under the same roof as AOS Offshore Solutions, Cortec's exclusive service provider for CorroLogic® services in Singapore.

Commenting on the new office arrangement, Philip Horsford, General Manager of Cortec® SEA, said, "Sharing the same premises generates more opportunities for collaboration, knowledge transfer and opportunity to explore our synergies. AOS offer[s] a range of Asset Preservation Services so we complement them perfectly having successfully worked on vessel lay ups, rig stacking and CorroLogic® AST projects."

Cortec® SEA's new offices are located within 30 minutes of the international airport and shipyards connected with hundreds of ports around the world, further strengthening Cortec® SEA's influence and support in the region. Originally established in 2018 to provide real-time technical assistance and fast order response, Cortec® SEA is proving to be a valued partner to clients in Singapore and surrounding nations of Southeast Asia.
