

Cortec®'s VpCI® Inhibitors – Great Success at University of Zagreb-Corrosion Seminar!

The seminar "Corrosion Inhibitor in Engineering Structures Protection" was held at the Faculty of Mechanical Engineering and Naval Architecture, University of Zagreb, Croatia September 27, 2013.

The seminar was attended by 60 engineers, technicians, production managers and other professionals dealing with the maintenance and protection of metal structures against corrosion. Attendees had the opportunity to deepen their knowledge about the most modern methods of corrosion protection in various aggressive environments.

General manager of EcoCortec® Ivana Radic Boršić giving a presentation on Cortec's VpCI inhibitors

Among the technologies of corrosion protection a significant place belongs to the application of corrosion inhibitors. The goal of the seminar was to educate engineers in Croatia about the premium inhibitors in the industry. The technology behind inhibitors and the advantages of their use is still insufficiently known in Croatia and as a result this subject initiated great interest among industry experts.

Seminar attendees had a chance to attend different sessions held by top professionals in the field in Croatia coming from scientific institutions and industry. After an introductory speech by Ph.D Vinko Simunovic, several presentations followed, covering the area of volatile

corrosion inhibitors and emphasizing VpCI® Vapor Corrosion Inhibitor Technology, the best technology on the market.

Managing director of EcoCortec®, Ivana Radić Boršić, presented VpCI® technology and demonstrated the use of new generation corrosion inhibitors for different industries. She also gave an overview of Cortec's range of products and presented EcoCortec® first Croatian plant of bioplastics. Unlike traditional hazardous products, Cortec®'s inhibitors are characterized by their high biobased content, sustainability, and high performance. The successful presentation was followed by numerous questions and interesting discussion.

Small exhibition area was also organised as part of the event

In the sessions that followed, presenters from leading Croatian companies and shipyards expressed their satisfaction with Cortec®'s VpCI® inhibitors and presented case histories on specific applications at their companies.
