PRODUCT RELEASE

Cortec's Desicorr® and Desicorr® VpCI® Pouches: Larger Sizes For More Protection.

Cortec® announces the release of new sizes of Desicorr® and Desicorr® VpCI® Pouches. Both pouches are designed to protect products, components, or assemblies from moisture when packaged in corrugated boxes, plastic wrap or bags, and wood or metal containers. These two-sided pouches contain either a desiccant, or a unique combination of desiccant and Vapor phase Corrosion Inhibitors (VpCI®).

The dual function of the Desicorr® VpCI® pouch reduces moisture in the air (desiccant action) and provides multimetal protection (VpCI® action) within a package. In essence, the desiccant action allows the VpCI® to have free access to the surface of the metal without competition from moisture on the metal surface.

Two-sided pouches contain a unique combination of desiccant and Vapor phase Corrosion Inhibitors (VpCI®).

New sizes for the Desicorr® Pouches include a 1 unit pouch, which will protect a 0.75 ft³ (21 L) area and a 2 unit pouch, which will protect a 1.5 ft³ (42 L) area. Desicorr® VpCI® Pouches now include a 1unit pouch, which will protect a 5 ft³ (140 L) area.
