

Croatian Plant Expansion Entering its Last Phase:

Brand New State-Of-The-Art Extrusion Line in EcoCortec!

EcoCortec's team is happy to inform you that brand new state-of-the-art extrusion line E4 has arrived to EcoCortec® plant. With this latest purchase the plant's production capacity will be furtherly increased. Some of the new extrusion line E4 features are: inline one-color printer, film lay flat width: 400 - 1000 mm, film thickness: 20 – 200 microns, max. extrusion output: 120 kg/hour. This new line will increase EcoCortec's capacity by 500 tons per year. It offers tubing film, gusset tubing film, SWS and CWS films as well as FlexPrint, custom print and standard Cortec print.

NEWS ALERT

Except for the growing sales, last year has been especially successful for our plant. EcoCortec has entered latest expansion phase as part of a project co-financed by Croatian Ministry of Economy, Entrepreneurship and Crafts within European Funds Programme. New plant is set open this fall during our European Sales Meeting. The goal of our team is continuous growth while maintaining highest quality

standards of our services that include new equipment procurement such as this high-tech extruding line. The result is plant's expansion and strong market presence.

Thanks to partners and distributors, EcoCortec's team is heading optimistically towards the future. In Cortec® Europe family they are intensely working on conquering new markets, not only in Europe but further. With excellent logistics, brand new facility, larger warehousing capacity and growing team, EcoCortec is more optimistic than ever to fulfill the mission of spreading environmentally safe corrosion protection technologies in Europe and abroad.

Result of growing business: New EcoCortec plant facility is set to open in October 2018 during Cortec European Sales Meeting.
