## Tackle Greasy Industrial Laundry with the Enzyme Power of EN-Z-KLEAN™!

Whether coming from auto repair shops, maintenance crews, or restaurants, greasy laundry can be a tough problem to tackle. Industrial laundering operations need detergent that is extra tough to extract and digest the greasy stains left behind in uniforms, linens, and other soiled fabrics that come for cleaning. That is where EN-Z-KLEAN™ laundry detergent concentrate saves the day.

EN-Z-KLEAN™ offers outstanding cleaning and stain removal power at any temperature range. It is specifically suited to greasy laundry because it contains a lipase enzyme that targets and digests fat and oil residues. Since the enzyme can tolerate high temperatures, EN-Z-KLEAN™ is also excellent for commercial cleaning operations where high temperatures are necessary to thoroughly clean and sanitize linens and uniforms.

While EN-Z-KLEAN™ is tough on industrial grease, it does not harm fabrics or hands. The detergent is biodegradable, phosphate-free, and safe for septic systems. With this user-friendly grease-intensive cleaning power at high temps, EN-Z-KLEAN™ is a great detergent to have on hand for janitorial, industrial, and commercial laundering and cleanup needs!
