**PRESS RELEASE**

## **Cortec's EcoAir® - Environmental Breakthrough in the Spray Can Technology!**

Cortec® is proud to introduce a major step forward in the spray can technology - EcoAir® - complete line of unique, air powder, water-based spray can products. Fast-acting, economical, dependable and safe to handle, EcoAir® leads the way in environmentally safe corrosion protection technology while eliminating waste disposal costs. For the first time, Cortec® is providing spray cans powered by compressed air that are complete, biobased replacement for expensive and hazardous chemical propellants.

**EcoAir® products exemplify Cortec's long-standing commitment to conserve our natural resources. They attack the toughest maintenance duties while being completely safe for the environment.**

In this revolutionary technology a four-layer EcoPouch is inserted into a can which is then pressurized. Finally, the EcoPouch is filled with the liquid. As the valve is depressed the surrounding pressure expels the bag's internal fluids until the product is used up.

EcoAir® line does not contain propellants, CFCs, or HCFCs that affect the atmosphere, the ozone layer, or the environment, they are formulated with biodegradable, nonpolluting ingredients and eliminate waste disposal cost. They have no chemical propellants or traditional aerosols and are non-flammable. The aluminum can is fully recyclable.

**EcoAir® BioCorr® provides excellent multimetal corrosion protection and displaces water and oil from metal surfaces combining film-forming additives with VpCI®**

**EcoAir® Corrosion Preventative, VpCI®-377 provides multi-metal corrosion protection indoors forming a clean, dry, hydrophobic film**

These products are able to spray in any direction, even upside down and are safe to ship and store. They are specially formulated to improve safety for the consumer and our surroundings. These safety improvements are reflected in the HMIS (Hazardous Materials Identification System) ratings chart for each EcoAir® product. The aluminum can is completely recyclable.

EcoAir® product line incorporates a wide range of innovative products:

- **EcoAir® BioCorr**
- **EcoAir® Cleaner/Degreaser, VpCI®-414**
- **EcoAir® Vapor Corrosion Inhibitor/Fogger, VpCI®-337**
- **EcoAir® Corrosion Preventative, VpCI®-377**
- **EcoAir® Non-Toxic Rust Remover, VpCI®-422 & 423**
- **EcoAir® Eco Tire Duragloss**
