Environmentally-friendly metal corrosion protection, lubrication

EcoAir Mold Release provides dual protection from corrosion by combining lubrication with a bio-based corrosion inhibitor for injection molds and other metal surfaces, leaving a clear, thin, non-staining silicone coating that makes it easier to release castings from their molds.

Multi-material adhesives

With the design engineer in mind, Scotch-Weld multi-material composite urethane adhesives DP6310NS and DP6330NS create durable bonds with minimal surface prep between medium- to high-energy surfaces like carbon fiber, fiberglass, reinforced plastics, and painted or unpainted metal.
