PRODUCT RELEASE

Save Time and Money with Cortec's EcoClean® Biodegradable Scale and Rust Remover powered by Nano VpCI®!

Buildup of scale and corrosion is a common occurrence in pipes and systems in constant contact with water. Waterborne minerals such as calcium carbonate naturally build up over time and accumulate on metal surfaces in thick layers of scale. Moist environments like this are also a breeding ground for rust and corrosion. Scale and corrosion slow down water flow, decrease heat-exchange efficiency, increase energy use, and incur costly downtime.

Unclogging your heat exchangers, chillers, condensers, cooling towers, and pipes is safe, fast, and easy with EcoClean® Biodegradable Scale and Rust Remover powered by Nano VpCI®! EcoClean® Scale

Remover is one of the fastest acting products on the market for dissolving heavy scale, corrosion, and naturally occurring oxides off metal surfaces in contact with water, providing one safe remover for all your descaling and de-rusting needs. The powerful corrosion inhibitors contained in this heavy-duty scale remover also protect metals from flash rust that would otherwise occur after treatment.

EcoClean® Biodegradable Scale and Rust Remover is non-toxic, biodegradable, and safe to use on ferrous and non-ferrous metals:

- Iron
- Carbon Steel
- Stainless Steel
- Copper
- Aluminum
- Magnesium
- Various Alloys

EcoClean® Scale and Rust Remover saves both time and money by creating clean surfaces that improve water flow in pipes and increase heat-transfer efficiency in heat exchange equipment. The product comes in a water-soluble pouch form that can be easily thrown into a system and circulated to protect hard-to-reach areas. This cuts down on labor, eliminates costly equipment dismantling, and reduces the cost of surface

preparation. For greater adaptability, EcoClean® Scale Remover is also available in easy-to-ship powder form and ready-to-use liquid form. Being biodegradable, it is easy and safe to dispose.

EcoClean® Scale and Rust Remover is one of the fastest acting products on the market for all your descaling and de-rusting needs, providing a quick, environmentally friendly cleaning solution with minimum downtime. It is a safe, simple, and effective way to preserve the quality of your water system and ensure it runs at peak efficiency.

Cortec® Corporation is the global leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Our relentless dedication to sustainability, quality, service, and support is unmatched in the industry. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001, ISO 14001:2004, & ISO 17025 Certified.
