

NEWS ALERT

EcoCortec® Brochure Now Available in German!

Cortec® is excited about its expanding EcoCortec® production facilities in Europe. This growth was recently reflected in the updated EcoCortec® brochure, which has now been translated into German. The translation will be an important advantage for German-speaking regions whose major manufacturing industries can benefit from EcoCortec's VpCI® packaging materials for metals preservation.

The brochure introduces EcoCortec's team and emphasizes the plant's interest in promoting and producing biodegradable and compostable packaging films. It covers EcoCortec's extruding, converting, and laboratory capabilities. The brochure also features information on EcoCortec® awards and involvement with scientific institutions and technical congresses.

Browse the newly translated German brochure for more information:
