PRESS RELEASE

Ribbon Cutting Ceremony:

EcoCortec®, Manufacturer of VpCl® Anticorrosion Packaging Opened Second Plant in Croatia!

We are more than happy to announce that EcoCortec®, manufacturer of environmentally friendly, VpCl® anticorrosion packaging materials has opened another plant in Croatia. The grand plant opening and ribbon cutting ceremony took place in Beli Manastir, Croatian town located in the eastern part of the country where the old plant is also located. Numerous guests as well as members of the media and local government including the Mayor of Beli Manastir were present. CEO of Cortec Corporation, Boris Miksic, cut the ribbon of the new plant, together with his mother Nina. Building of a new plant

has been co-financed by Croatian Ministry of Economy, Entrepreneurship and Crafts within European Funds Programme. Since new requirements for equipment and additional space were growing every day, this expansion was a logical step. Growth of production and building capacities is a vital part of EcoCortec's strategy. New production hall will boost plant's manufacturing capabilities and will help EcoCortec's staff respond even more promptly to every day market challenges. As part of Cortec Europe Group, EcoCortec® plant provides high-technology, corrosion protection packaging solutions and exports its products worldwide. Along with new offices, brand new 2000 m² facility also includes state-of-the-art extrusion line E5. With this latest purchase, the plant's production capacity is furtherly increased. Some of the E5 extrusion line features are: 6.2 meter wide film, bags on roll and perforated sheets.

Ribbon cutting ceremony.

CEO, Boris Miksic, talking to the members of media.

2018 has been especially successful for EcoCortec®. Along with the growing sales the company has finalized its expansion and entered numerous new projects. Currently, EcoCortec® is a partner in the €1.95 million European BIOCOPACK project supported by the Interreg CENTRAL EUROPE. EcoCortec® also launched Europe's first collection and recycling initiative for used films and plastic bags. Both projects are aimed to decrease plastic waste in Europe, one of the world biggest growing problems. With excellent logistics, brand new facility, larger warehousing capacity and growing team, EcoCortec® is one of the most productive plants in the industry in Europe. Its team is especially proud to be spreading environmentally safe corrosion protection technologies in Europe and abroad.
