## EcoLine® Drilling Rod Grease Featured in New Equipment Digest!

EcoLine® Drilling Rod Grease was featured in the November issue of New Equipment Digest (NED)! NED, which calls itself “the industry’s most preferred products magazine for 75 years” is a major source of innovative product news for hundreds of thousands of industrial personnel in the United States.

NED highlighted EcoLine® Drilling Rod Grease as a premium quality biobased and biodegradable lubricant for drilling rod applications. It noted that the grease contains extreme pressure additives for excellent protection where constant drilling vibration creates a high load on drilling rod joints. EcoLine® Drilling Rod Grease is also recommended for use in environmentally sensitive areas near waterways. \*
