Attention: Editor August 20, 2019 PRESS RELEASE

Cortec[®] EcoLine[®] Fifth Wheel Grease Awarded USDA Biobased Certification

Cortec[®] has added another name to its growing portfolio of USDA Certified Biobased Products! The newly awarded USDA Certified Biobased label signifies that EcoLine[®] Fifth Wheel Grease contains 91% USDA certified biobased content and qualifies for federal purchasing in accordance with the USDA BioPreferred[®] Program. *

EcoLine[®] Fifth Wheel Grease is premium quality biodegradable grease formulated from vegetable oils and a lithium-based thickener. Its superior lubricity and advanced extreme pressure additives promote longer equipment life by reducing friction and wear. The grease shows good adhesion to resist water washout and has a wide range of operating temperatures.

Semi-truck fifth wheels need frequent lubrication to protect against friction, wear, and binding of the fifth wheel to the trailer apron. Cortec's EcoLine[®] Fifth Wheel Grease offers an excellent biobased, biodegradable alternative to conventional all-purpose greases for lubricating metal-to-metal contact areas such as fifth wheels. Instead of risking potential pollution with a fossil-fuel based grease that could spill on the ground, using EcoLine[®] Fifth Wheel

Grease on semi-trucks provides needed lubricity but is non-harmful to the environment if it happens to leak on the road.**

As with other specialized products in Cortec's expanding portfolio of biobased greases, EcoLine[®] Fifth Wheel Grease is not limited to fifth wheel application. It also serves as good all-purpose grease for trailer hitches, mechanical joints, and any other sliding or rolling metal-to-metal contact areas where an NLGI grade 2 EP (extreme pressure) grease is needed.
