## Cortec® Swiss Distributor Emphasizes VpCI® Technology at EMPACK 2018

VpCI® Technology was well-represented at EMPACK 2018 by Cortec's official Swiss distributor, Corpac AG. In its 12<sup>th</sup> edition last April, EMPACK 2018 has become an important national event for the Swiss packaging industry, gathering together suppliers of packaging technologies for many different sectors including food, clothing, engineering, chemicals, and transportation. Corpac was present among these exhibitors to share the important packaging aspect of protecting metals from corrosion, focusing on VpCI® Technology solutions at its well-designed booth and in the exhibitor catalog.

Corpac emphasized the importance of corrosion protection for "value preservation" and noted how Cortec® VpCI® products can be used to protect metal components in many different industries, including automotive, watchmaking, printing and manufacturing, construction, energy, aeronautics, and armaments. Corpac pointed out how Cortec's comprehensive method of protection goes beyond packaging to include preservation options in the areas of metal processing, surface prep, coatings, repair, and maintenance.

Cortec® appreciates the outstanding efforts of distributors like Corpac, who make significant investments to communicate the advantages and far-reaching potential of VpCI® Technology to industries in different regions around the globe.

Cortec® Corporation is the global leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001 and ISO 14001 Certified, and ISO 17025 Accredited.
