Food Grade Lubricant is safe for food, beverage, and pharmaceutical use

Average 0 out of 5

## Food Grade Lubricant is safe for food, beverage, and pharmaceutical use

Multi-purpose, light duty, non-toxic CorrLube contains only USDA H-1 approved ingredients. Deep penetrating formulation frees rusted or corroded fasteners and facilitates easy operation of air-actuated pins and guides. Very low surface tension on water-oil-metal-air interfaces allows complete surface coverage and water displacement. CorrLube contains H-1 approved bacteriostatic preservative that retards bacteria growth, and can be used on machinery where incidental contact with food may occur with no danger of food contamination. It is suitable for use as anti-corrosion film on equipment during idle periods. Tested according to ASTM D-97, D-1748, D-130, D-971, D-445, and D-2161, it is RoHS compliant.
