## EcoShield® Super Barrier Paper Intro Among Most Read in “Inside Industry”

Cortec’s introduction of EcoShield® Super Barrier Paper and Linerboard was among the most read articles at Inside Industry, a publication that connects industrial decision-makers with news from a variety of sectors. The article announces Cortec’s important development of a water-based moisture barrier paper and linerboard that is fully recyclable.

EcoShield® Super Barrier Paper and Linerboard offer moisture barrier properties competitive with traditional waxed and polyethylene coated paper. However, unlike these traditional materials, EcoShield® Super Barrier Paper and Linerboard does not require costly processes to remove the coating before it can be recycled.

As such, EcoShield® Super Barrier Paper and Linerboard is a more environmentally friendly way to protect against moisture, grease, and oil leaching into or out of a package. It is another example of Cortec’s mission to create practical and convenient eco-friendly products for users.

(inside)industry

Cortec® Corporation is the global leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries.
