

NEWS ALERT

It's Time to Take the Next Logical Step for AST Protection!

Calling all terminal owners, operators, engineers, and service providers! The 27th Annual International Aboveground Storage Tank (AST) Conference is just around the corner, April 23rd-25th at Rosen Shingle Creek Hotel in Orlando, Florida. Hosted by the National Institute for Storage Tank Management (NISTM), this event will be a great opportunity for anyone in the midstream oil and gas market to learn more about optimizing processes and maximizing the life of critical assets such as aboveground storage tanks (ASTs).

A highlight of this event is the free trade show, where Eric Uutala (Technical Sales Manager) will be answering questions on [CorroLogic®](#) technologies at Cortec's booth. This is a not-to-be missed opportunity for those in the region to talk one-on-one with a [Cortec®](#) expert on leading edge strategies for protecting ASTs from soil-side corrosion and promoting the safety of oil transport at cased pipeline crossings.

The April conference will also be an excellent time to meet other oil and gas professionals from around the world and learn from a wealth of sessions on AST management, operations, safety, and standards. Some of the classes and events leading up to the trade show are also free, so be sure to check out the agenda if your time or budget won't allow you to attend the main event. If you do sign up for full registration, keep your eye out for Eric as he takes advantage of educational sessions to continue boosting his knowledge of ASTs and better serve this sector.

April will be here before you know it, so plan now to give a boost to your oil and gas asset protection knowledge and networking by signing up for the Orlando conference! Together, we can take the next logical step toward better corrosion protection and AST management. Register today!

NISTM 2025

April 23rd-25th, 2025

(Free trade show is April 23rd-1:00 pm, April 24th)
