

# NEWS ALERT

## Join Us at the ACI Concrete Convention for Great Credits and Conversations!

**MIGRATING CORROSION INHIBITORS**  
FROM GREY TO GREEN

We hope to see many of you at “The World’s Gathering Place for Advancing Concrete,” March 24<sup>th</sup>-28<sup>th</sup> in New Orleans! As always, the spring ACI Concrete Convention will be a great time to catch up with Cortec® MCI® Sales & Technical staff and mingle with thousands of professionals and students in the concrete industry. This will be our second year hosting a booth at ACI, and we hope you can take advantage of this opportunity to visit us at our “base camp” during the event. We are also proud to be an ACI sponsor in the “Admixture” category!

We expect the spring convention to be yet another rich time for all of us to build our concrete knowledge, network, and influence. With 40+ hours of education and technical sessions, ACI is a great place to earn CEUs and PDHs. Receptions and networking events such as the “Concrete Mixer” provide plenty of fun venues for connecting with engineers, contractors, educators, and suppliers. Finally, ACI’s 400+ committees provide a wealth of opportunities to grow by joining and contributing your own industry knowledge or simply observing one of the many meetings in session for future reference.

If you are involved with MCI® and the construction industry, be sure to consider joining us at this important event. We look forward to having you there and seeing us all come away with new knowledge, ideas, and connections to propel us forward in our concrete service life extension and sustainability efforts!
