

# NEWS ALERT

## Join Us at “The World’s Gathering Place for Advancing Concrete”!

The ACI Concrete Convention is coming October 29<sup>th</sup>-November 2<sup>nd</sup> to Boston, Massachusetts. We look forward to joining a host of concrete industry professionals and hope you will be among them as we work together to advance the concrete construction industry!

The 2023 convention will include a year of “firsts” for **Cortec® MCI®**: (1) Our team will host its first ACI booth, and (2) Kevin Quan (MCI® Regional Sales Manager) will experience ACI for the first time. Returning attendees Jessi Meyer (VP of Technical and Product Sales) and Lisa Marston (Regional Technical Service Engineer) will complete our dynamic crew, making this year’s convention a great time for you to learn more about MCI® Technology while getting to know some of the individuals that support and represent it.

As usual, the convention will be a powerful occasion to network with a rich cross-section of industry professionals, including engineers, contractors, educators, and manufacturers. Special networking events such as the “Concrete Mixer” and “President’s Reception” will provide invaluable venues for connecting with other guests, committee chairs, and chapter presidents.

A menu of 60+ technical sessions will offer a wealth of educational opportunities, plus the chance to earn personal development hours (PDHs). Finally, 300+ committee meetings open to all attendees will provide ample time to network and grow in a different dimension with the potential for future contribution.

Called “the world’s gathering place for advancing concrete,” the ACI Concrete Convention stands out as one of the richest technical venues for concrete networking. Register today and be sure to stop by our first MCI® booth at ACI in Boston!
