

NEWS ALERT

Join Us to Talk CorroLogic® at the NISTM AST Show!

With more than [half a million aboveground storage tanks \(ASTs\) in the U.S. alone](#), our team is ready to provide much-needed corrosion solutions to tank owners and operators at NISTM's 17th Annual National Aboveground Storage Tank Conference & Trade Show in The Woodlands, Texas.

Eric Uutala ([Cortec®](#) Technical Sales & Product Manager) and Bob Boyle (Cortec® VP - Integrity Management & Preservation Solutions), two experts in oil and gas industry preservation, will be at the December 10th-12th event to share CorroLogic® solutions to corrosion on AST bottoms and the pipelines that transport oil and gas from the field to the tank. Admission to the exhibit hall on December 11th and 12th is free, making this an excellent opportunity to connect face-to-face with two of the individuals closest to the technology that has become a new industry standard in AST protection. Those who choose to register for the main conference can also expect a great lineup of presentations on AST basics, legal updates, best practices, and more. To top it all off, visitors to the trade show and conference will have the distinct opportunity to connect with industry professionals who know their industry inside and out, yet continue looking for ways to grow.

If you are in the Texas area or ready to hop on a flight to learn more about ASTs, plan to join us for this important industry gathering in December. Mark your calendars and sign up today!

NISTM 2024
