PRESS RELEASE

Cortec® Laboratories ISO/IEC 17025 Recertification Includes NACE VIA Testing Accreditation!

Cortec® Laboratories has once again received certification as an ISO/IEC 17025 laboratory testing accredited facility, now with additional accreditation to perform the NACE TM 0208-2018 industry standard VIA test.

After successfully passing this year's audit, Cortec® Laboratories received ISO/IEC 17025

recertification on July 2nd, 2019. This internationally recognized standard confirms the competence of Cortec® Laboratories to produce reliable testing results accepted in countries around the globe and promotes confidence in the work of the lab.

Under the scope of this certificate, Cortec® Laboratories is accredited to perform 19 tests that reflect Cortec's broad range of activities in the corrosion control industry. The scope includes VCI (vapor corrosion

inhibitor) testing, immersion testing, humidity testing, salt fog testing, electrochemical testing, and, among others, ASTM G180 testing of corrosion inhibiting admixtures for steel in concrete.

Cortec[®] Laboratories showed itself to be an industry frontrunner by achieving ISO/IEC 17025 testing accreditation as far back as 2010. Today, the lab continues to be an exemplary model of testing competency in the corrosion control industry with the recent expansion of its scope to include all-important NACE VIA testing accreditation.
