Cortec® Academy Prepares Engineers for Asset Preservation in the Libyan Market

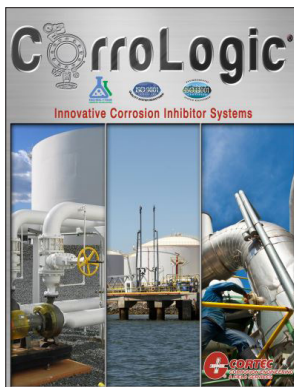

CORTEC®
MIDDLE EAST

Environmentally Safe VpCI®/MCI® Technologies

Cortec® Middle East (CME) carried out a three-day Cortec® Academy training session last month in Cairo, Egypt, with engineers from Germa Group, CME's distributor in Libya. Khalil Abed, CME's Innovation and Strategy Director, led the comprehensive training, which included instruction on Cortec® products, application, and CorroLogic® engineered solutions. Highlights included Aboveground Storage Tank (AST) preservation, inventory preservation, and Cased Pipeline Crossing (CPC) CorroLogic® VpCI® Filler applications. The class also enjoyed a deep dive into market and client-specific analysis.

Libya is an important player in the oil and gas market with large reconstruction and development projects earmarked for the near future. Thanks to Cortec® Academy, the Germa team is now equipped to present the full range of Cortec's asset preservation solutions to this significant market.

Cortec® Corporation is the global leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001 and ISO 14001 Certified, and ISO 17025 Accredited.
