

New Production Facility for Corrosion Inhibitor Packaging

Corrosion control technologies group Cortec Corp. (St. Paul, Minnesota, USA), through its EcoCortec subsidiary, is build-

ing a new production facility in Beli Manastir, Croatia to produce vapor-phase corrosion inhibitor films and bags. The new facility comes in response to a continuous increase in demand. The expansion project is being cofinanced by the Croatian Minis-

The films are used to protect metal parts and equipment from corrosion during storage and shipping. Photo courtesy of Cortec.

try of Economy, Entrepreneurship, and Crafts (Zagreb, Croatia) within its European funds program. The additional production hall will boost the plant's manufacturing capabilities and enable the company's staff to respond more promptly to market challenges. The company says 90% of its products are exported to Europe, Asia, and the United States, with products ranging from film and foam technology to premium custom-converted papers.

Kernan Named Vice President

Derek Kernan. Photo courtesy of NDT Global.

Ultrasonic inspection and pipeline integrity management company NDT Global (Dublin, Ireland) named Derek Kernan as vice president of quality management. In this

new role, Kernan holds overall responsibility for quality management, including global quality services for all aspects of the company's global business. This includes document control, corrective action systems, continuous improvement, internal auditing, supplier quality management, and quality assurance for data services. Kernan brings a wealth of experience in organization building, team direction, strategy development, process improvement, customer relations, and problem solving, says
