

# NEWS ALERT

## Cortec's CorrBlock™ Featured in May Issue of Water World Magazine!

### Corrosion inhibitor

CorrBlock™ is a time-released, biodegradable corrosion inhibitor block for water treatment industries

and marine ecosystems. This safe-to-handle and easy-to-apply block is formulated using renewable soybean-based wax and proven Vapor phase Corrosion Inhibitor (VpCI®) technology. When immersed in water, it slowly dissolves and releases a calculated amount of inhibitors required for corrosion protection, which provide multi-metal protection and are an excellent replacement for chromates, nitrites and others. In addition to preventing corrosion and pitting, CorrBlock eliminates the need for dosing pumps and tanks for conventional liquid inhibitors as well as protects tools, work-pieces and metalworking machines during downtime.
