### **PRODUCT NEWS RELEASE**

## **Cortec® Corporations MilCorr® VpCI™ Shrink Film is the Ultimate Additives Package.**

Cortec® Corporations MilCorr® Vapor phase Corrosion Inhibitor (VpCI™) Shrink Film is a composite film featuring Cortec® multimetal VpCI™ with high ultraviolet light protection. MilCorr® VpCI™ Shrink Film provides a top-notch universal protection system.

MilCorr® VpCI™ Shrink Film is designed to be an alternative to expensive multi-layer laminated flexible constructions and eliminates the need for vacuum packaging and dehumidification. MilCorr® VpCI™ Shrink Film is strong and resistant to puncturing or tearing, incorporating a high shrink force for broad application. MilCorr® Shrink film provides unitized, tight, and pilfer-proof loads. Forklift forks will not affect wrap below the pallet. MilCorr® Shrink film also provides extra protection for outdoor storage, shipments, and is effective in severe outdoor climates. MilCorr® VpCI™ Shrink Film makes immediate use of protected object (vehicle, equipment, etc.) upon removal possible.

Cortec® Corporations MilCorr® VpCI™ Shrink Film provides multimetal corrosion and UV protection. Shrink film is strong and resistant to puncturing and tearing, incorporating a high shrink force for broad application.

Shrinking can be performed in a tunnel, in an oven, by lowering a rectangular heating element over the load or by portable heating guns. Typical shrink temperature range: 340° – 440°F (171° – 227°C). Typical sealing temperature: 240° – 320°F (116° – 160°C).
